

SUCCESS STORY

XS252TV - Liebherr R9350 Conversion

Application: Mining
 Mineral: Coal
 Machine: R9350
 Solution: XS252TV

HENSLEY PRODUCT OFFERING

- XS252TV Teeth
- 144XS252 Adapters
- LS55002200 J-Bolt Shrouds

RESULTS

- Maximum Penetration
- Increased Machine Efficiency
- Even Wear Profile
- Self Sharpening
- Exceptional GET Life Cycle Support

Customer Upgrades R9350 to Hensley

The XS252TV tooth profile was specially designed by Hensley engineers to maximize penetration and increase machine efficiency. This tooth encourages an even wear profile and sharpens as it wears, allowing end users to maximize their production and maintain consistent fill factors throughout the GET product life cycle.

In particular, coal miners in Southeast Asia are having great success with this product. Hensley is working closely with customers in this area of the world to ensure they are getting the most out of their GET solutions and receive a level of product support that is second to none. This includes on site evaluations, preventative maintenance training, welding instruction, and product education.

The partnership has been so successful that Hensley is now installed on a wide variety of Hydraulic Excavators in the area, including Komatsu, Hitachi, Liebherr, and O&K machines.
