## XSC12 - WH10 Berkeley Lip Conversion

Application: Mining  
Machine: P&H 2800 XPB  
Lip: Berkeley Whisler 10  
Solution: XSC12

### HENSLEY PRODUCT OFFERING

- 5609XSC12 Adapters
- XSC12RMHL Teeth
- WCXSC12 Wear Caps

### RESULTS

- Improved Safety
- Increased Ease of Adapter Replacement
- Quicker Tooth Replacement
- Extended Tooth Life
- Exceptional GET Life Cycle Support

## Customer Upgrades Electric Shovel to Hensley Adapter System

The maintenance manager at a hard rock mine in Western Canada was recently approached by Hensley and SMS Equipment and offered a level of product support that he could not refuse. This particular site has historically relied on a competitor to support 100% of its GET requirements. However, management was so pleased with the results of the first installation that they are now in the process of converting the entire fleet over to Hensley products.

The upgrade to XSC adapters has also eliminated the need for hammering adapters into position, thus increasing safety and improving the ease of maintenance. The customer has also noticed a significant reduction in the time required for tooth change out and is working closely with its PSSR to maximize overall GET performance. They are currently running an XSC12RMHL style tooth and will be closely monitoring machine performance to ensure that they get the most out of their Hensley solution.
