

SUCCESS STORY

XSC127 - Reduces Maintenance Time

Application: Mining
 Machine: P&H 2800
 Lip: Berkley WH10
 Solution: XSC127

HENSLEY PRODUCT OFFERING

- 498XSC127 Adapters
- XSC127V Teeth

RESULTS

- Minimal Change Out Time
- Reliable Tooth Pin
- Extended Tooth Life
- Less Down Time

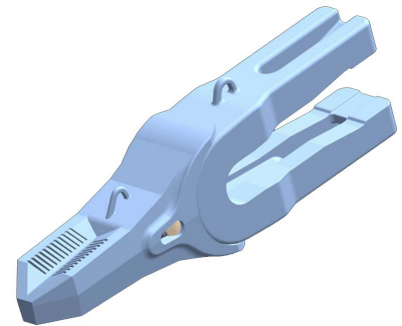

Customer Upgrades Berkley Shovels to Hensley GET Systems

The management at a hard rock mine in the United States has come to rely on Hensley Industries as the preferred supplier of G.E.T. for their electric shovels.

The top priority for this operation is to minimize the tooth change out time during regular maintenance. It's really quite simple, by minimizing their change out time they can maximize production.

In fact, during a cost savings program initiated by the mines corporate office, it was discovered that the Hensley system offered an additional 18 hours of production, per year per machine over the competition. At the end of the year that provides a substantial savings, and one that most mining operations cannot afford to ignore.
